BHI Door Slabs: Plastpro Nova90 Series Product Offering

Check out our current offering of these top-quality direct-glazed fiberglass doors!

Enjoy more of Florida's brightness and beauty from the comfort of your home with the increased glass viewing area of our Plastpro Nova90 Series Direct-glazed Fiberglass Doors. All of these doors we carry feature insulated Low-E glass in a variety of opacities and impact resistances— each securely factory glazed in-between that slab's two door skins- providing a more rigid and leak-free design than traditional flush-glazed doors which use stop moulding to glaze the glass after the door has been assembled. The slight brushed textured allows for a smooth look at distance, but also greatly benefits both the paint and staining processes. **Not all options are available in all sizes, please see the back of this flier for a complete listing of available items.

Standard Features:

- 1-3/4" door thickness
- Insulated Low-E glass
- White brushed texture
- 25 year limited warranty

**Available Options:

- Impact glass
- Non-impact glass
- Clear glass
- White translucent glass
- Low-E 272
- Low-E 366
- Full lite
- 3/4 lite over one panel bottom
